## CSG and CRDS on Business and Alternative Revenues

Verified 01 mai 2022 - Legal and Administrative Information Directorate (Prime Minister)

The CSG (generalised social contribution) and the CRDS (contribution to the repayment of social debt) are levied on income from employment and on replacement income (unemployment benefits, retirement pensions, etc.). Rates vary depending on the type of revenue. Some people receive a reduced rate or an exemption based on their income. Some income is exempt.
