Disability pension: third-party mark-up (MTP)

Verified 01 avril 2022 - Legal and Administrative Information Directorate (Prime Minister)

Third-party mark-up has been replaced since 1st March 2013, through the third-party redress supplement (PC RTP). The third-party mark-up allows the recipient to receive a higher disability pension. The increase is paid, subject to conditions, to cover the costs of assistance in daily life.

Its amount is **upgraded annually**.

You're active

What are the conditions for the award?

You can benefit from the Third Person Boost (MTP), if you have a 3rd Class Disability Pension, which means that you meet the following 2 conditions:

- You are unable to work
- Your disability requires you to seek the assistance of a third party to perform ordinary acts of daily life

You can also benefit from this increase if you need the help of a person to carry out the acts of daily life at the latest, before age 67 (if you were born in 1955 or later).

It is the medical consultant of the social security organisation you depend on (CPAM or MSA) who determines, based on a grid of 10 ordinary acts of everyday life, whether you need the assistance of a third person.

This grid allows it to evaluate whether or not you can perform the following acts **only** :

- Get up and go to bed
- Get up from a seat and sit in it
- Move around in your accommodation, including a wheelchair
- Settle in and out of your wheelchair
- Raise yourself in case of fall
- Leave your home in case of danger
- Dress and undress completely
- Eating and drinking
- Go urinate and go to the saddle without help
- Place your orthopaedic device (if necessary)

The consultant determines the number of acts for which you need assistance.
